### Beta Marine large, hybrid and saildrive engines

#### Repower your boat with Beta Marine engines

AD Marine offers all of the quiet, reliable and economical Beta Marine engines, from 10hp small engines up to 150hp for large seagoing vessels.

Beta Marine has also achieved considerable success in producing an innovative and reliable hybrid engine solution, as well as saildrive systems and packages to suit pleasure craft and professional boats.

#### About Beta Marine

Beta Marine was formed in 1987 by four marine engineers.

Their objective was to provide reliable diesel marine engines to suit individual boat owner requirements, rather than to be dictated to by big boat builders.

This marine expertise rapidly gained Beta business, linked with sensible engine pricing.

Beta is now a major equipment supplier to the international yacht, sports and work boat markets, and has supplied over 25,000 marine diesel engines.

#### Beta Marine engines

Beta Marine has a deserved reputation for compact, quiet and reliable heat exchanger cooled diesel marine engines.

The Beta 150 engine is designed for large seagoing vessels like commercial fishing boats.

Beta Hybrid engines link Beta diesels with electric power, so you can cruise conventionally on the Beta diesel engine, or using the 10kW electric motor powered by your batteries.

Beta engines and Hybrids have a 5 year 'self service' warranty.

#### Beta Marine saildrive solutions

Beta Marine has a range of heat exchanger cooled diesel marine propulsion saildrives from 10 to 60hp, and three saildrive solutions:

- 1) Replacement engine fitted to an existing Volvo 1105 or 1205 or a Yanmar SD20 seadrive leg with special feet
- 2) Replacement engine + Seaprop 60 saildrive to fit your GRP base
- 3) New Beta Marine engine, Seaprop 60 saildrive + new GRP base

<b>Beta 150</b>
6,700cc 6 cyl diesel. 147bhp @ 2,800rpm IVECO block, PRM 500 hydraulic gearbox 12V starter and 90 amp battery charging
<b>Hybrid engines</b>
Beta Marine B25H, B43H, B50H and B60 10kW motor with push-button controller
<b>Saildrives</b>
Heat exchanger cooled saildrive 13 – 56hp Smooth, quiet, economical marine diesels 2 year self-service warranty included

### Beta engine range

The Beta 150 is a 6 cylinder heavy duty, direct injection diesel engine developed for fishing boats. It has peak torque at just 1,700rpm making it quiet and economical.

Beta Marine Hybrid engines are based on their reliable Beta 25, 43, 50 and 60 engines, using smooth high quality Kubota diesels linked to a 10kW electric motor for quiet environmental friendly power.

Beta Saildrive engines offer yacht owners a wide range of solutions available at an affordable price.
